Global Warming Webquest – Urban Planner

Name: _____

Group Members: _____

Date: _____

1) Write a half page biography describing what training you need to become a policy analyst. What kind of subjects would you need to study in school? What kind of activities do you conduct on a day-to-day basis?

2) What kinds of technologies, materials, and design elements are urban planners using to make buildings and communities more energy efficient?

3) What are some of the technologies, materials, and design elements available for a homeowner to make a house more energy efficient?

4) What is the urban heat island effect? How can "green rooftops" help address problems associated with the urban heat island effect?
